

Telcall+

What Is Telcall+?

Telcall+ from Austral Safety Net Inc. is a one word platform for a range of innovative HF radio services....

- **Telephone Interconnect** (direct dial any mobile or landline phone in Aust.)
- **E-Mail** (use e-mail to connect with family and friends)
- **GPS** (position reporting and safety logging)
- **SMS** (send a text to any mobile phone in Australia)
- **Mail Box** (unique 2 way message storage and retrieval)
- **H.E.L.P. (4357)** (simplified remote area emergency call system)
- **One Low Cost** (\$30/year...no pro rata fee applies)

Unlock the real potential of your HF radio to enable new technology systems developed by Austral members for Austral members that will broaden your HF radio communication capabilities.

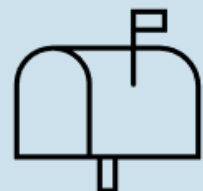

Just think of the opportunities delivered by Austral's Telcall+ system.

Now you can use your HF radio to send an e-mail or SMS messages to any email recipient or Australian mobile phone. Family and friends anywhere in the world with the use of the Out-n-About™ mobile phone app, can send messages back to your HF radio through the use of **Mail Box**.

Send a message to another Austral members HF radio - their radio doesn't need to be in range or powered up. Your message could be sent via one Austral base, stored in the cloud, and later delivered via another different Austral base.

Use your HF radios GPS capability to log your position for viewing anytime by family and friends and other Austral members (password secure)...better still, need help in a hurry?. Send your GPS coordinates to Austral's H.E.L.P. (4357) HF incident response call system, wait a short while for one of several Austral rostered base operators to respond to your call.

At last, an "incident response required" HF radio call system managed by responders who know HF radio and its phone interconnect nuances. These Austral H.E.L.P.(4357) responders will know, who you are, which channel and base your called through, and if your HF radio is GPS equipped, know your location - to activate the assets pursuant to your medical emergency or welfare remote area needs. [see separate H.E.L.P. (4357) leaflet]
